Triumph Loop

The Triumph loop pile carpet tile is 50cm x 50cm and is made from a 100% solution dyed nylon composition with a Latex Bitumen secondary backing, making it hard-wearing and long-lasting. Nylon is one of the most popular synthetic fibres for carpet, the non-absorbent properties of nylon meaning stains shouldn't soak in. Solution-dyed nylon carpet is a pre-dyeing process, prior to the yarn being produced, the fibre is dyed with molten nylon polymer allowing the colour to permanently stay in the fibre. This also allows the use of bleach cleaning solutions, without losing any colour to your carpet. The loop pile construction of this carpet tile adds texture and a stylish appearance whilst remaining durable and well-suited to use in high
